Achievements

Tamarak Trail
29/02/2024
Versus Evil
Our game Tamarak Trail is released on Steam. Loved to read what players have to say about the game

Education

Silesia University Bachelor
Video games programmer Katowice, Poland • 10/2018 - 02/2022
Thesis project "Implementation of a mobile game using a gyroscope and accelerometer to control the character"

Experience

Yarrow Games Ontario, Canada (remote)
Unity developer 03/2022 - 01/2023
coding NPC behavior, game effects, etc. using c#; creating game UI elements; designed new game features, skill ideas for player, monsters, etc.
BoomBit S.A. Gdańsk, Poland (hybrid)
Playable ads developer 01/2023 - 03/2024
creating playable ads using Three.JS with TypeScript for internal projects. every 2 weeks - new playable or changes to the existing ones based on feedback, new ideas, revision, etc.
Cation Studio USA (remote)
Playable ads developer 09/2024 - 09/2026
creating 4-5 playable ads per month using js and combining three.js, pixi.js + our internal engine/wrapper. projects are 2d and 3d with wide range of gameplay

Projects

Ihlathi 2019
My first team project made during university. I was a programmer on it. You can see it on my portfolio site
Thesis project 03/2021 - 05/2022
Created a mobile space shoot 'em up game for Android in Unity. Everything was created by myself
Bunch of projects for game jams on itch.io (2019 - present)
you can check them out on my [itch.io](#) page (visuals are awful, I know :)). I participate in them from time to time using Unity as my main engine
Cargo Snake Defender (2025 - stepped down)
was creating a project with my friend for facepunch's second game jam in s&b, but we decided not to submit it, cause it wasn't fully finished
